

Special Requirements

- Prior to collecting the specimen, please contact your nearest Lavery Pathology Collection Centre for instructions on delivery times.
- **For Fertility Testing and Post Vasectomy Testing** - The sample must be delivered to the Collection Centre or Testing Laboratory (see overleaf) as soon as possible after collection. As it is important that the specimen reaches the testing laboratory **within 1 hour** of collection.

Equipment

- 1 x White top container

Please follow these instructions

1. Specimen is to be collected at least 3 days **after** your last ejaculation. But no longer than 5 days.
2. DO NOT use condoms, artificial lubricants, talcs, etc., as these will interfere with the test results.
3. Collect the ENTIRE sample in the container provided by means of masturbation. Other methods, such as interruption of intercourse, are not suitable as there can be a loss of the first portion of the specimen.
4. DO NOT expose the container to extremes of temperature before or after specimen collection.
5. During transport to the **Collection Centre**, the sample should be kept at room temperature (between 20°C and 37°C). This is best achieved by keeping the sample next to your body during transport.
6. **DO NOT REFRIGERATE SPECIMEN**
7. Label container with your surname and given name, date of birth, date and time of collection and test name.
8. Please see overleaf for the list of laboratories.

Please follow the details below and deliver with the specimen (SEMEN ANALYSIS)

Surname: _____ Given Name: _____

Address: _____

_____ Telephone No: _____

Referring Doctor: _____

1. Test for (please tick) fertility confirmation of sterility after vasectomy post vasectomy reversal**2. Is it more than 2 days since intercourse?** YES / NO
